Zvarich	Zijelvet	Zagros	Zinâth	Zikaros	Zilora
Zahra	Zald	Zaleos	Zanela	Zantus	Zelgana
Zelsea	Zilennora	Zindelo	Zolena	Zordral	Zorlus
Zsanett	Zuzela	Zvalana			

Kismet's Thayan Names

Name Generator

All you need to use this generator are d10s. You can roll 1d10 and halve the result (rounding down) to choose which chart to start with, roll once more to determine which vertical column to use, and again for the horizontal column. Roll three dice together to shorten the process and then arrange the pieces in the way that sounds best.

For instance, I grabbed three dice and rolled them at one time to produce: 7 (or 1/2, 3), 3, 7 = ja. I rolled the same three dice again to get 9 (4), 4, 7 = nora. Together they give me Janora (or Janor, if I want to remove the last syllable), which sounds just right to me.
